```java
public class Pattern
{
    public static void main(String[] args) {
    int lines=4;
    int i,j;
    int space=0;
    for(i=0;i<lines;i++){// this loop is used to print lines
        for(j=1;j<=space;j++){// this loop is used to print space in a line
            System.out.print(" ");
        }
        for(j=1;j<=lines;j++){// this loop is used to print numbers in a line
            if(j<=(lines-i))
            System.out.print(j);
            else
            System.out.print("*");
        }
        j--;
        while(j>0){// this loop is used to print numbers in a line
            if(j>lines-i)
            System.out.print("*");
            else
            System.out.print(j);
            j--;
        }
        if((lines-i)>9)// this loop is used to increment space
        space=space+1;
    System.out.println("");
    }
}
```
